

# NorDoc agreement for an open market for PhD courses

The activities of NorDoc aim to initiate, facilitate and intensify collaboration among the Nordic doctoral schools/faculties/universities in all relevant fields for the benefit of Nordic doctoral candidates<sup>1</sup> and their supervisors in order to support and ensure the highest possible quality in doctoral education in the health sciences<sup>2</sup>.

In pursuance of the NorDoc Mission Statement of 2016, the NorDoc member organisations agree to provide free access for Nordic doctoral candidates to current PhD courses offered by members of the network. This agreement outlines the provisions for access to PhD courses with the waiver of course fees.

The purpose of this agreement is to strengthen the NorDoc collaboration according to the Mission Statement as well as to create an open market for PhD courses within the NorDoc framework, promote mobility among doctoral candidates and offer a larger catchment area of course participants.

The NorDoc member organisations agree on the following principles to secure free access to PhD courses for NorDoc doctoral candidates.

## Selection criteria and priority of applicants

- The NorDoc member organisations will in general give priority to doctoral candidates from other NorDoc member organisations to the extent that rules and regulations of the member organisation allow it.
- Principles of selection criteria and priority of applicants at the NorDoc member organisations are shown in the table below.

## Fees and payment

- Doctoral candidates from a NorDoc member organisation can apply for PhD courses at other NorDoc member organisations. Course fees (if any) will be waivered.
- In the case that a NorDoc member organisation charges a course fee to its own enrolled doctoral candidates, NorDoc doctoral candidates from other member organisations will be charged as well.
- Late-cancellation fees, no-show fees, direct equipment fees, board and lodging fees may be charged according to rules and regulations of the individual NorDoc member organisation. Transport to course venue and lodging are not covered by the course provider.

## General provisions

- The effect of the agreement is overall resource neutral. The NorDoc member organisations aim to contribute to the purpose of this agreement by offering seats/places in their PhD courses corresponding to their relative size in the NorDoc network.
- A PhD course is defined as a course activity approved by the doctoral school/faculty/university in question and offered in a course catalogue (or similar).
- When a doctoral candidate participates in a PhD course at a NorDoc member organisation, that NorDoc member organisation decides when the doctoral candidate has completed a PhD course satisfactorily. Other member organisations acknowledge this decision.
- If this agreement contradicts any national or university rules and regulations of the NorDoc member organisations, such rules and regulations prevail over this agreement.

<sup>1</sup> In this agreement the term 'doctoral candidates' is used equivalently with the terms PhD students, PhD fellows, doctoral fellows etc. This is in line with the mission statement.

<sup>&</sup>lt;sup>2</sup> For further information, please see appendix 1, mission statement

- The member organisations acknowledge the ECTS calculation of PhD courses offered by other member organisations.
- The member organisation will hold PhD courses in English if requested by a non-native speaker.

## Administrative provisions

A doctoral candidate must state at which NorDoc member organisation she/he is enrolled, when she/he applies for participation in a PhD course. This is necessary in order to grant priority and have any course fee waivered.

## Promoting and marketing the agreement

The NorDoc member organisations strive to efficiently advertise and promote the NorDoc collaboration and the possibility of free PhD courses access among doctoral candidates and PhD supervisors. The NorDoc member organisations aim to establish a joint course database for NorDoc doctoral candidates.

## Commencement, follow-up and inclusion of new member organisations

This agreement is effective from the NorDoc network meeting in Reykjavik 24 May 2018.

At the annual NorDoc network meetings, the member organisations will follow up on the status of the agreement. The agreement will be evaluated two years after the commencement. Member organisations will report on the approximate number of NorDoc doctoral candidates participating in PhD courses at their institutions.

Any new NorDoc members included in the network after the above-mentioned date must accept the terms of this agreement in writing to the NorDoc chair. NorDoc memberhip implies participation in this agreement.

## Withdrawal

If a NorDoc member organisation terminates its membership of the NorDoc network, the termination also implies withdrawal from this agreement. Please refer to the mission statement regarding withdrawal from NorDoc. Any commenced course activities must however be completed.
